LSAMS

Lazada Seller Activation

Management System

End-to-end field activation platform — from lead import to live seller. Built for the Lazada ecosystem, designed for mobile field teams.

200+

Leads Managed

App Store Needed

THE CHALLENGE

Managing seller activation manually

Spreadsheets, phone calls, zero visibility into what happens in the field.

- No visibility into field activity
- Leads scattered in multiple spreadsheets
- No GPS verification of visits
- Duplicate leads across batches
- No Gabay performance tracking
- Lazada had no real-time dashboard

THE SOLUTION

One unified platform

Everything in one system — leads, visits, registrations, assignments, reports.

- **Lead pipeline** — full tracking from pool to live seller in 8 clear stages
- **GPS-verified visits** — Gabay logs coordinates, outcome and notes on mobile
- **Smart AI assignment map** — distributes leads by city territory and workload balance
- **Lazada executive portal** — live KPIs and charts, dedicated read-only login
- **Duplicate detection** — Excel import checks Lazada ID and phone on every upload
- **Notifications & stalled alerts** — auto-flags leads with no visit in 7 days

ACCESS CONTROL

Six roles — right access for every team member

Each role has a dedicated interface. Gabay agents get a mobile app. Lazada team gets a clean executive portal.

Power User (Superadmin)

Full system override. Manages all users, resets passwords, sees everything. Reserved for Sir Abbie.

Admin

System configuration, user management, full data access across all modules.

Manager

Approves registrations, views Daily Digest, monitors all Gabay performance and scorecards.

Supervisor

Assigns leads via Smart Map or manual bulk upload. Exports data. Manages campaigns.

Gabay Agent

Field agent on mobile PWA. Logs GPS visits, updates lead status, sees only their own pipeline.

Lazada (Read-Only)

Clean KPI dashboard. Lance, Grace, LazadaMGR. Aggregated data only — no personal seller info.

Lead Pipeline

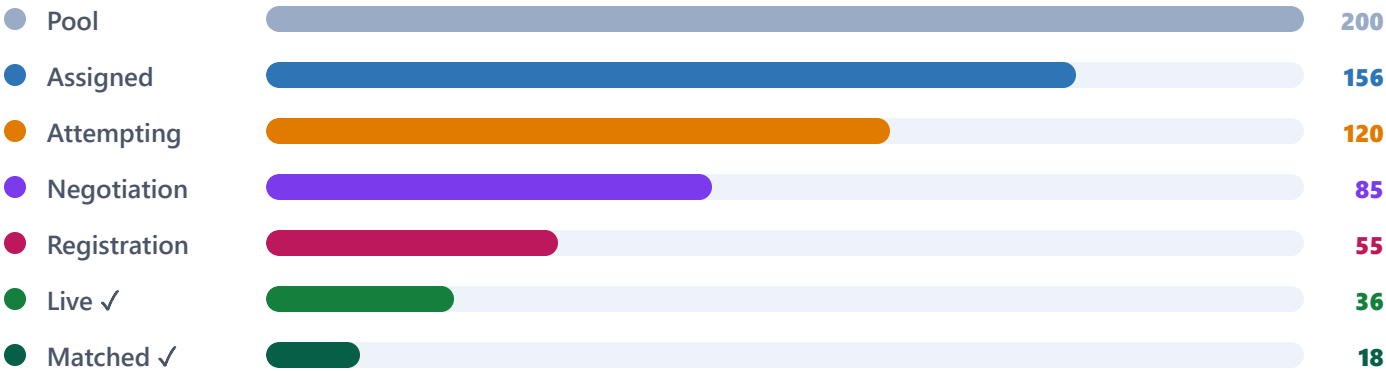

Every seller moves through 8 defined stages. Each stage has a responsible role and clear exit criteria.

Pool → Assigned → Attempting
→ Negotiation → Registration
→ Live → Matched → Closed

PRIORITY SCORING

Stalled · Hot · Warm · Normal
Auto-flagged by age + visit recency

LIVE PIPELINE SNAPSHOT

- Duplicate Detection** — checks Lazada ID & phone on every Excel import
- Assignment Audit Trail** — every re-assignment logged with who, when, by whom
- Campaign Tracking** — conversion rate per batch file

SYSTEM CAPABILITIES

12 integrated modules — one platform

Lead Management

Excel import with duplicate detection, bulk & smart assignment, status tracking, full audit trail.

Smart Assignment Map (AI)

Groups leads by city on Leaflet map. AI picks lightest-loaded Gabay per territory. One-click approve.

Reports & Analytics

Live KPI dashboard, Gabay scorecards, pipeline funnel, visit trends, CSV export.

Manager Daily Digest

Morning brief — visits today, inactive Gabay alerts, pipeline snapshot. Printable.

GPS Visit Logging

Gabay logs visits with live GPS coordinates, outcome type, notes, follow-up date.

Registration & Approval

Document checklist (DTI, TIN, Bank, Gov ID), manager review, VW / VW-RRLD classification.

Notifications & Alerts

Stalled lead alerts (7 days no visit), follow-up reminders, pending registration flags.

Batch / Campaign Tracking

Every Excel import tracked as a campaign with conversion rate and status breakdown.

GABAY MOBILE APP

Works on any phone — no App Store needed

Progressive Web App (PWA). No Apple or Google approval. Update the server once — all phones get it instantly.

- Install on phone home screen (2 minutes)
- Works **offline** — syncs automatically when back online
- GPS check-in with live map preview
- Today's follow-ups highlighted on home
- Stalled lead warnings (7+ days no visit)
- Personal scorecard & conversion rate

HOW GABAY AGENTS INSTALL IT

- **Open browser on phone**
Navigate to 192.168.10.78:5001
- **Log in with Gabay credentials**
Auto-redirected to the mobile home screen
- **Tap "Add to Home Screen"**
Browser prompts automatically — also in browser menu
- **LSAMS icon appears on home screen**
Opens full-screen, looks and feels like a native app

Mobile app screens

- 🏠 Home — KPI tiles, follow-ups, priority leads
- 👤 My Leads — filter by status, search
- 📍 Check In — GPS, outcome, notes
- 📄 History — visit log by date
- 👤 Me — personal scorecard, pipeline

Lance, Grace, and LazadaMGR each have a dedicated login. They land directly on a clean executive dashboard — no internal operations visible.

Total Leads

FULL PIPELINE COUNT

Live Sellers

ACTIVE ON LAZADA

Conversion %

POOL → LIVE RATE

Monthly Trend

6-MONTH LINE CHART

- Pipeline funnel (all 8 stages)
- Monthly visits vs new live sellers trend
- Top cities — live seller counts bar chart
- Category breakdown — doughnut chart

- No seller names or contact numbers shown
- Aggregated numbers only — no personal data
- Dark mode toggle built-in
- Data refreshes on every page load

Login credentials: lance / Lazada@2026 · grace / Lazada@2026 · lazadamgr / Lazada@2026 → <http://192.168.10.78:5001>

Smart Assignment Map

- All pool leads plotted on Metro Manila map
- Grouped by city — circles sized by lead count
- AI assigns each city to lightest-loaded Gabay
- Supervisor swaps any city in one tap
- Workload preview shows before + after
- One button approves all — full audit logged

3 ASSIGNMENT METHODS

1. Manual — checkbox selection

Tick individual leads on the table, pick a Gabay from the dropdown, click Assign. Best for one-off re-assignments.

2. Click Gabay card first

Click a Gabay workload card to pre-select them, then tick leads. Useful for balancing a specific agent's workload.

3. Smart Map (AI) ← Recommended

System generates a full territory plan on a live map. Supervisor reviews, swaps cities if needed, approves all with one click. Full audit trail recorded.
